

THE WILDLANDS CONSERVANCY

**California nonprofit public benefit corporation
dedicated to preserving the beauty and biodiversity
of California and to funding programs so that every
child may know the wonder and joy of nature.**

1990 – The Corridor Trail System Master Plan was funded by an Interagency Agreement between the following:

Counties: San Bernardino – Riverside – Orange

Cities: Anaheim, Chino Hills, Colton, Corona, Highland, Huntington Beach, Loma Linda, Redlands, Rialto, Riverside, San Bernardino

Other Agencies: Orange County Water District, State of California – Dept. of Parks and Recreation, U.S.F.S., San Bernardino National Forest, National Park Service, Rivers and Trails Conservation Assistance

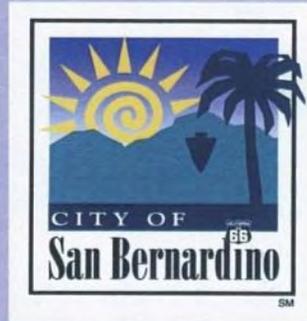

The Wildlands Conservancy's goal is to bring Nature into the Lives of Urban Kids

- **2001 Santa Ana River Renaissance**
- **2005 Policy Advisory Group (PAG)**
 - **County Supervisors, Mayors, SAWPA and TWC**
 - **Technical Advisory Committee (TAC)**
- **2006 M. O. U. signed**
- **2007 Prop 84 passed**
 - **45 million dollars**
- **2009 Completion of Blue Ribbon Committees**

Joint effort of Blue Ribbon Committees: resulted in vision plans to revitalize and transform communities along the SAR by creating a Greenway Park from crest to coast.

Santa Ana River Trail

ADOPT-A-TRAIL PROGRAM

The City of Colton, in its ongoing effort to keep its residents informed and involved, has established the "Adopt-A-Trail" Program, to keep Colton trail users active and engaged in trail development, implementation, and maintenance. The goal of the Adopt-A-Trail Program is to have Colton trail users take "ownership" of their trail, through a written commitment to frequent, utilize, patrol, and maintain this community amenity.

Through a written application and agreement, Colton residents commit to "adopt" a stretch of the Santa Ana River Trail in Colton. This commitment includes regular visits to the trail, reporting of non-conforming trail usage, notation of large-scale maintenance, vandalism or repair issues, and small-scale routine maintenance, including trash abatement and trail sweeping. Individuals are given necessary tools and equipment to perform these duties, and the agreement contributes to a reliable schedule, ensuring regular trail maintenance, and enhancing security of volunteers and trail users.

This program is the collaborative effort of the City of Colton, Mayor and City Council, Recreation & Parks Commission, County of San Bernardino, Colton Santa Ana River Trail Citizen's Committee, and the Colton Police, Fire, Public Works, and Community Services Departments. It is through the strength of this collaboration that everyone remains informed and involved in the future of the trail and its users.

City of Costa Mesa

City of Costa Mesa
**Santa Ana River Trail
Vision Study**

Used with the permission of the artist, Lauren Donnes, and Friends of Harbor, Beaches and Parks.

April 15, 2008
Santa Ana River Trail Blue Ribbon Committee

Figure 5: Santa Ana River Flood, 1938

This dramatic photo of the 1938 flood in Orange County is oriented downstream towards the Pacific Ocean and shows several breaches in the Santa Ana River levee near present day Gisler Avenue and Mesa Verde Golf Course. The water spread to the bluffs that are now Fairview Park in Costa Mesa in the left side of the image. It is easy to envision how this area was historically characterized by extensive wetlands. The area to the east of the river was historically known as "La Cienega de las Ranas" or "Lake of the Frogs" (Mitchell, 2006).

River Park, the 1000+ acres of parks, wetlands, open space and river corridor around the lower reach of the Santa Ana River, including Costa Mesa's Fairview Park.

This confluence of efforts for the Santa Ana River and the Orange Coast River Park resulted in Costa Mesa's City Council formally authorizing the City to participate in a "Santa Ana River Habitat and Recreational Planning Project" and to accept a grant from The Wildlands Conservancy to support this effort on August 1, 2006. To facilitate this effort, the City Council appointed a "Blue Ribbon Committee" to create a vision study that addresses habitat restoration, passive recreational activities and trail links along the Santa Ana River through Costa Mesa. This group met from January through November 2007 to develop this vision for Costa Mesa's reach of the Santa Ana River.

Key Issues

In order to understand and identify the key issues affecting the Santa Ana River through Costa Mesa, the Committee reviewed background documents and maps and then undertook a field trip, walking the entire length of the river through Costa Mesa on a Saturday morning. The following are key issues that were identified by the Committee that are more general in nature, affecting most of the river through Costa Mesa:

Figure 10: Informal Trails Along Levee

Figure 11: Locked gates at pedestrian trail entrance.

Figure 12: Bikes and Pedestrians Sharing the Santa Ana River Trail

- Some proposed types of recreation along/adjacent to the trail may not be appropriate or compatible relative to surrounding land uses.
- Many informal social trails have been formed between the levee and the lower trails, damaging vegetation and causing erosion (*Figure 10: Informal Trails Along Levee*).
- There are many locked gates along the trail corridor which block access (*Figure 11: Locked Gates at Pedestrian Trail Entrance*).
- Given the volume and speed of bike use along trail, there are potential conflicts with pedestrian users (*Figure 12: Bikes and Pedestrians Sharing the Santa Ana River Trail, Figure 13: High Speed Group Cycling Use*).
- There is no dedicated public safety patrol for the river at this time.
- Additional amenities such as signs, rest areas and trash receptacles are needed along trail.
- When using the trail, it is difficult to identify when one is entering or leaving the City of Costa Mesa due to a lack of identify signs.
- There are no strong east-west trail connections to the Santa Ana River
- There are many planning efforts underway as well as upcoming opportunities for Santa Ana River-specific funding.

Figure 13: High Speed Group Cycling Use

Figure 17: "Cadillac Trail" Connection

Figure 18: I-405 Undercrossing

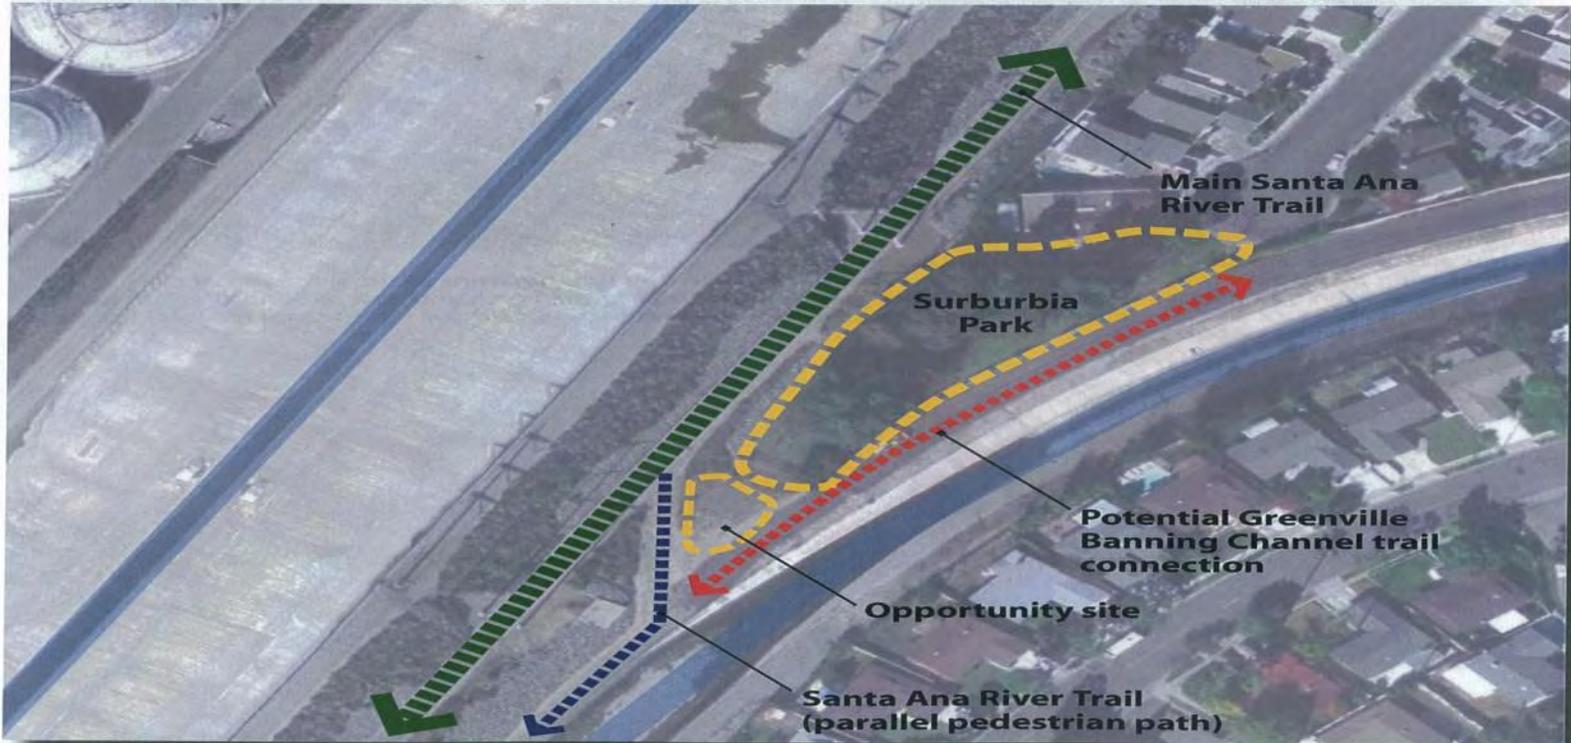

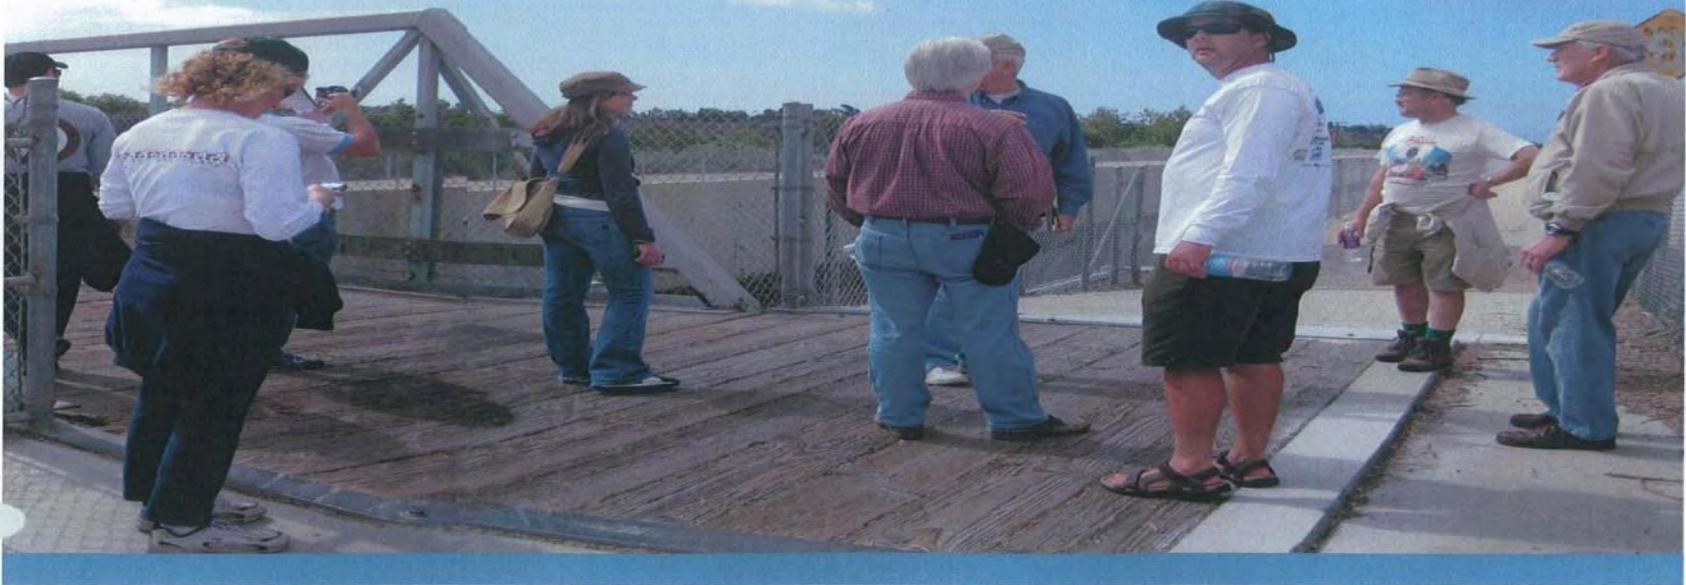

Figure 19: Suburbia Park Area

Figure 22: Greenville Banning Channel Trail Opportunity

An existing pedestrian trail parallel to the main Santa Ana River Trail runs adjacent to the west side of the Greenville Banning Channel. Opportunities exist to extend the trail to the north and east of Suburbia Park as part of a west-east trail connection and to open the service road on the west side of the channel for local use by residents of this neighborhood.

Proposed Actions

Proposed Actions

While some recommendations can be achieved in the short term, realizing the long term vision for the Santa Ana River in Costa Mesa will require a long term commitment from City Council, City staff and the community. Considering this, the Committee proposes the following next steps to move this vision into reality.

- Engage community and other stakeholders early in and throughout the planning and implementation process.
- Work with residents adjacent to the River to identify their concerns and develop potential solutions.
- Engage constituencies beyond the main stem of the Santa Ana River.
- Implement a demonstration project adjacent to neighborhoods that are receptive to the concept of a river project to show the benefits of river enhancement.
- Conduct outreach and education to show implementation tools and benefits to the community.
- Coordinate with other cities, agencies and organizations that have undertaken “Blue Ribbon” processes to explore opportunities for implementation of common goals and objectives.
- Build upon the existing momentum and support for the Santa Ana River.
- Identify, define and prioritize specific projects based on Vision Study goals, objectives and community input.
- Encourage the City’s Parks and Recreation Commission to hold workshops to receive input on project ideas and prioritization from the public.
- Build on OCRP partnership agreement MOA.
- Explore project, program and partnership opportunities.
- Explore alternatives for management of corridor in partnership with The Wildlands Conservancy and other stakeholders.
- Research and pursue potential federal, state and local funding, particularly Proposition 84
- Appoint a follow-up Ad Hoc Committee to facilitate moving the vision study towards implementation.
- Coordinate with Cities of Newport Beach and Huntington Beach to develop a cooperative implementation strategy for the lower reach fo the Santa Ana River.

Vision

Vision

Based on the observations of the river corridor and knowledge of Costa Mesa, the Committee developed the following long term vision statement for the Santa Ana River Trail corridor. The statement describes the desired future condition of the river and its role in the community.

“Restore and enhance the varied amenities within and the connections and access between the coastal bluffs, riparian lowlands, and wetlands to the Santa Ana River corridor as natural open space that provides recreation, reflection, and education opportunities for the benefit of residents and visitors of Costa Mesa.”

Goals & Objectives

The following goals identify near and mid-range outcomes that support long term realization of the vision. The supporting objectives under each goal identify specific, shorter term tasks that will help to accomplish these goals.

1. **A river corridor in which the natural resources and character are preserved, restored and enhanced.**
 - a. Restore and enhance natural habitat within and around the Santa Ana River Trail and connecting trails.
 - i. Use appropriate native plants for habitat value, habitat connectivity and ornamental landscaping.
 - ii. Install irrigation systems to support habitat enhancement and restoration and ornamental landscaping.
 - iii. Partner with the native plant nursery at the Huntington Beach Wetlands and Wildlife Care Center to grow appropriate native plant stock.
 - b. Expand and enhance park land along the Santa Ana River corridor.
 - i. Evaluate opportunities for appropriate/compatible uses along the river corridor (i.e. active recreation, BMX uses, etc.).
 - ii. Identify opportunities for informal, unstructured spaces where “kids can be kids”.
 - c. Enhance water resources, including wetlands, along the Santa Ana River corridor.
 - i. Develop and implement storm water best management practices along the river corridor.
2. **An interconnected Santa Ana River corridor multiuse trail and open space network with improved connectivity, circulation , and public access.**
 - a. Create east-west connectivity from the Santa Ana River to major nodes and destinations in Costa Mesa and to Upper Newport Bay.
 - i. Evaluate mobility options for east-west connections to the Santa Ana River corridor (i.e. Greenville-Banning Channel, etc.).
 - ii. Evaluate public transit connections to the corridor.

Summary Vision

The Santa Ana River is a unique asset and source of pride for many communities. Providing a destination for residents and visitors alike. They celebrate the rich heritage and natural beauty of the river and are committed to restoring and conserving its native habitats. They recognize its recreational and educational values, economic potential, and the opportunities these present for enhancing the quality of life now and for future generations.
